## **DETAILED ACTION**

Applicant's amendment dated 7/20/07 has been received in application serial number 10/524,176. All comments have been taken into consideration.

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-4, 6-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Marton 6,849,085. Marton discloses the invention as claimed noting figures 9a and 9b comprising: A radially expandable multilayer tubular structure (9:43-48) intended to be

used as a stent with at least inner and outer layers each of the of the layers being formed from a metal or metal alloy (13:43-52; 14:34-36) and each having opposite inner and outer surfaces, the outer surface of the inner layer being secured (9:65-67; 11:7-10); in substantially face t face engagement with the inner surface of the outer layer to define an integral metal to metal bond there between, recesses (74, 75, 83, 85, 17:36-67; 18:1-56) being formed in one of the inner and outer surfaces of the inner layer and extending partly towards the other of the inner and outer surfaces of the inner layer , the outer layer being formed with an array of the radial perforations extending entirely there through from the inner surface to the outer surface thereof.

### ***Allowable Subject Matter***

Claim 5 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9—16 are allowed.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
